The valves can be used in potentially explosive areas.

Valves delivered for use in potentially explosive areas are provided with an additional earthen device, to be connected and tested according the instructions in the user manual, by the end user, before operation. The user is obliged to identify dangerous ignition sources, perform a risk analysis of the entire system and initiate the necessary preventive measures. Therefore the use of conductive versions might be necessary.

ACTUATORS AND ACCESSORIES

Actuators and accessories can be delivered according the ATEX requirements and in accordance with the appropriate Zone as specified by the purchaser. These products are subject to a separate conformity analysis according to ATEX. The user is responsible to consider all the safety instructions for applications in explosion hazardous areas.
